

# CAPTAINS Program Features

1. Manage all of the POTWs in the Control Authority
2. Manage all of the Industrial Users on each POTW
  - a. Contacts
  - b. Industrial categories
  - c. Federal Reg Nums
  - d. NAICS Classifications
3. Easily create, or modify permits and limits for each industry and POTW
4. Track Industrial Inspections
5. Enter, track, and analyze Sampling data for the industries and the POTWs
6. Automatically determine limit violations
7. Print complicated quarterly or semi-annual reports with the click of a button.
8. Manage user access and permissions in the program
9. Export data to Excel for assisting in headworks calculations or submission to state agencies
10. Enter samples by parameter or sampling frequency (Ease of data entry)
11. Enter sampling data in the units received from the lab – CAPTAINS automatically converts the units to the permit units.

# CAPTAINS 11 New Features

1. The user now has the ability to change their background in the program (including removing totally).
  - a. Look under [Tools / User Settings]
2. POTW Permits & Limits
  - a. Ability to enter Permit Limits for things other than Wastewater Effluent (such as stream limits)
3. POTW Sampling Section
  - a. Enter Samples by Parameter
  - b. Enter Results by Sample Frequency
4. POTW Reports
  - a. POTW Sample Overview
    - i. NOTE: If you do not have the DMR Module, you will not see calculations on the Overview – only sample data.
    - ii. You can view the overview by Wastewater Effluent or any other category.
  - b. Discharge Monitoring Reports
5. Ability to generate Discharge Monitoring Reports. (Additional cost – price TBD)
  - a. DMR Setup (on Administration Tab)
6. Data Trending – Now you can view trends at the click of a button. This will help you as you evaluate historical trends for setting new limits in order to increase available capacity.
  - a. Ultimately, this may allow you to bring in new industries without having to undergo a multi-million dollar expansion.
7. New License Key system
  - a. Enter the license one time for all users
  - b. Now, when your license expires, you are not required to reinstall the program to enter a new license
8. New Database Connection System
  - a. CAPTAINS 11 has the ability to connect to Databases hosted in the Cloud
  - b. Goldie offers to host your data
  - c. You can either use domain login, or login and password systems
9. The about screen now shows the number of permitted industries your lease includes.
10. New Simplified Program Installer.
11. We now offer cloud hosted solutions – for both the front-end and for the database.

# CAPTAINS 11 Improvements

1. CAPTAINS 10 could not accept dates beyond 12/31/2020. This limit has been removed.
2. On the export, the sample location is now listed.
3. You can now name your database anything – CAPTAINS 11 can connect to it.
  - a. The database can be in the cloud.
  - b. You can use windows authentication or user login to access database.
  - c. This allows you to have a test “learning” and a production database.
4. Speed improvements throughout the program.
  - a. The Sample Overview is especially faster.
5. Now, if the program cannot find the database, it will prompt for a location.
6. Administrative users may now reset the passwords of other users.
7. Quarterly reports allow you to paste custom data into the report (in one section only).

\*\*\*\* = not yet implemented
